EXPERIENCE

- Customer Support Internship at Guruji Astro Company, Delhi, India. (Feb 03/21 - April 27/21)
Where I have to solve Customer's query via Phone and Chat.
Maintain my Worksheets.
I cleared 72% of the customer query properly.
Got 23 (5 star ratings from customers) in 30/45 days.
- Data Entry at teacheron.com
- Home Tution, I teach Nursery to 4th standard students.

PROJECTS

- **Website** : Build a website for a solar company, where I'm using React Js. The website is live on <https://stellular-truffle-72f17e.netlify.app/> & for storing form data and calculator data I'm using firebase real-time database.
- **Countdown Timer** : Create a Countdown Timer, Design the front end by using HTML & CSS and operation in countdown timer by using Vanilla JavaScript.
- **Quiz App** : First I create an array for storing Quiz questions & answer options, then I do the frontend by using HTML & CSS, after that I do the operations by using Vanilla JavaScript.
- **Note App** : Make a structure of note app using html & in JS I made different functions like function for adding new notes the buttons, on buttons I use eventlistener for the event & designed using css.
- **Github profile search** : Here I made a profile structure using HTML & then in JS I stored the API url for github then making different functions & use eventlistener on buttons for doing certain events & design all using css.
- **Password Generator** : Create different fields or I say Check boxes in HTML then write functions in JS & do designing using css.
